

TRAINING & E-LEARNING LOCALIZATION

Expanding your business to foreign markets and need to train your new employees and clients? Designed a new e-Learning program and want to make sure it resonates with your multilingual audience? Commit Global can help you adapt your training and e-Learning material, making sure it is culturally appropriate for the target audience. Simple text, PowerPoint presentations or voice-over: whatever your needs may be, our team of experienced linguists can help enhance the effectiveness of your program and get the maximum out of your training investment.

THE RIGHT TOOLS

Commit Global uses industry-leading multimedia localization and project/workflow management tools that drive down costs, maintain consistency, streamline processes and preserve language assets for future use. We use the latest technologies and software to ensure your final product is up-to-date with the most recent authoring programs and trends. We take care of your multimedia content localization while you are in total control at every project stage.

EXCEPTIONAL SERVICE

E-Learning and Training localization is a complex procedure that requires the coordination of various tasks and resources. Our in-house teams consist of project coordinators, project managers and linguists that have been trained, working and acquiring experience in the e-Learning and Training localization field and are able to deeply understand the linguistic issues and the technical challenges of your e-Learning projects. Also, Commit Global is certified according to ISO 9001, 17100, 13485 and 27001 applying strict QA procedures during everyday work.

SELECTED RESOURCES

Because of the specialized nature of e-Learning and training projects, Commit Global uses only professional linguists, subtitlers and engineers to fully meet our client's most complex localization needs. Our resources are carefully selected, are native to the target language and have substantial experience in e-Learning localization. Also, if your project requires voice-over services, then we offer professional voice over talents/actors in more than 50 languages. We will find and suggest the most suitable voices to guarantee your video project will be a success.
